**Frame Width Column** - refer to this column when using **Plan** Views

The area between the two thick lines is the angle of view for the selected lens

Frame Height Column - refer to this column when using **Elevation** Views

Lens Designations - these numbers denote the focal lengths for the various primes available in each format

When using for elevations, line the 5 foot mark up with the floor line to allow for a nominal camera height.

Lens Nomen - line this up with the hashmark for the lens focal length selected

Using the Quick View II
